Pengana Raises Quarterly Dividend

The Board of **Pengana International Equities (PIA)** have declared a fully franked final dividend of 1.35 cents per share, also providing guidance which would see the quarterly dividend reset at this new level. This represents an 8.0% increase over the previous year's amount. Pleasingly, the result reaffirms the Company's two-pronged investment objective, which seeks to deliver capital growth in conjunction with regular and reliable fully franked income. PIA currently has profit reserves to sustain this payout ratio for the next 11 years, supported by a franking account that is sufficient to ensure franking to the fullest extent for the next 3 years, assuming the worst case scenario in which no further corporate tax is paid; an extremely attractive proposition for those investors seeking diversified, stable and secure fully franked dividends from global mandates.

Chinese Sell-Off

China's latest regulatory crackdown on private education companies essentially decimated an entire industry, resulting in a ban which would prevent these after school tutoring enterprises from generating profits and receiving foreign capital investments. The announcement adds to a range of strengthened regulations on China's e-commerce businesses surrounding consumer protection and anti-trust grounds. However much of this sentiment remains to appear priced into Asian mandated listed investment companies, with the average share price to NTA discount across 3 vehicles staying constant from calendar year to date. These Managers all boast prominent sector exposure to Consumer Discretionary, IT and Financials. The opinion seems to remain that China will not act to curtain its newfound sources of growth and innovation, especially when technological independence is coming to the forefront.

[&]quot;The Indicative Pre-Tax NTA has been adjusted for dividends. Dividends are removed from the NTA once the security goes ex-date and until the receipt of the new cum-dividend NTA. #The Indicative NTA is the actual reported monthly pre-tax NTA as we have been unable to calculate the Indicative NTA within a reasonable level of accuracy. *The Indicative NTA is the actual reported daily pre-tax NTA as we have been unable to calculate the Indicative NTA within a reasonable level of accuracy. +Prem/Disc does not adjust for the dilution of unexercised options.

BELL POTTER

We have enclosed a reference page for dividends. We have used historical dividend data for the dividend information, and manager guidance where appropriate. Please note that historical dividends are no guarantee of future dividends to be paid.

BELL POTTER

Measurement of LIC performance is calculated after all operating expenses, provision and before the payment of taxes (after realised capital gains taxes if reported by the Company). Performance also assumes the reinvestment of net dividends, but does not incorporate franking.
